The models and equipment versions illustrated and described in this brochure and some of the services listed are not available in all countries. Some of the cars illustrated are equipped with optional equipment for which an extra charge is made. Details concerning the delivery specifications, appearance, performance, dimensions and weights, fuel consumption and running costs of the vehicle were correct to the best of our knowledge at the time of going to press. Deviations from the colours and shapes shown in the illustrations may occur. No liability is accepted for errors and printing errors. The right to introduce modifications is reserved. Not to be reproduced, including in part, without the written approval of AUDI AG.

This brochure is printed on paper made from pulp bleached without the use of chlorine.

The equipment for the vehicle illustrated in the Fascination section can be found on page 62. The fuel consumption and CO_2 emission figures can be found on page 56.

Unconditional dynamism. With prestige.

Puristic elegance. Incredible power. Cutting-edge engineering. Combined in just one vehicle: the Audi RS 7 Sportback.

Unconditional driving pleasure. With Audi cylinder on demand.

The 4.0 litre V8 TFSI engine generates 412 kW and delivers a maximum torque of 700 Nm. Pure power that the quattro permanent all-wheel drive transfers to the road with confidence. The sprint from 0 to 100 km/h is effortless and takes just 3.9 seconds. The RS 7 Sportback also knows how to impress when it comes to efficiency, with Audi cylinder on demand shutting down four of the eight cylinders in the partial-load range. The engine continues to run smoothly and powerfully regardless. The difference is that fuel consumption and emissions are reduced.

Less weight equals more driving pleasure. The intelligent Audi lightweight technology improves the power-to-weight ratio and sharpens the handling dynamics. You are also assured of superb roadholding thanks to the standard RS adaptive air suspension. There is also the option of the RS sport suspension plus with Dynamic Ride Control (DRC) for a further reduction in the vehicle's pitching and rolling movements.

Unconditional athleticism. With elegance.

Elegance at its most powerful: the trademark Audi Singleframe featuring a matt aluminium-look frame and gloss black honeycomb grid creates an impression of outstanding strength. RS bumpers with large side air inlets and integrated flaps as well as the optional innovative Audi Matrix LED headlights with dark-tinted surrounds help to underline the individual character of the Audi RS 7 Sportback. The tornado line sets the tone for the side view's dynamic appearance, which is further emphasised by the distinctive widened sills. The trim strips and exterior mirror housings in matt aluminium look add some RS-specific touches.

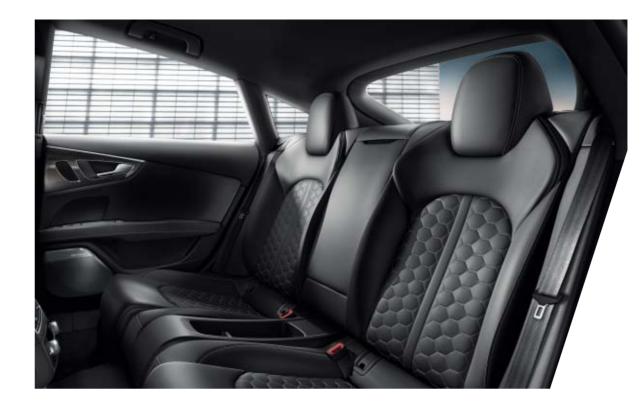

Unmistakeably RS: the sporting traits of the Audi RS 7 Sportback. The optionally available 21-inch cast aluminium wheels in 5-spoke blade design provide a clear view of the optional ceramic brake behind. The RS bumper with gloss black diffuser insert and integrated oval tailpipe trims brings the vehicle's dynamically styled rear to an impressive conclusion.

The interior exudes sportiness, exclusiveness and quality the moment you open the door. Details such as the illuminated door sill trims, stainless steel pedals, door openers with a delicate double-bar design and carbon inlays all serve to underline the vehicle's premium character. The RS sport seats with their boldly contoured form offer excellent lateral support even on the most challenging drives. Optional seat upholstery in Valcona leather with honeycomb-patterned stitching in rock grey adds to the sporty, exclusive ambience.

Not only does the Audi RS 7 Sportback feature unique dynamism, the way in which it adapts to the driver is just as individual. Thanks to the 8-speed tiptronic's Dynamic Shift Program (DSP), the transmission can automatically adjust to your driving style. Fast, precise gear changes at exactly the right moment help you to drive just the way you like. What's more, the transmission's wide ratio spread serves to increase efficiency, too.

With Audi drive select you can also modify the vehicle's character at any time at the push of a button. From the engine to the suspension, a range of components and systems can be configured for an even sportier or a more balanced ride.

Exclusive design. Unconditional dynamism. Experience all the fascination of an exceptional high-performance car – the Audi RS 7 Sportback.

Vorsprung durch Technik.

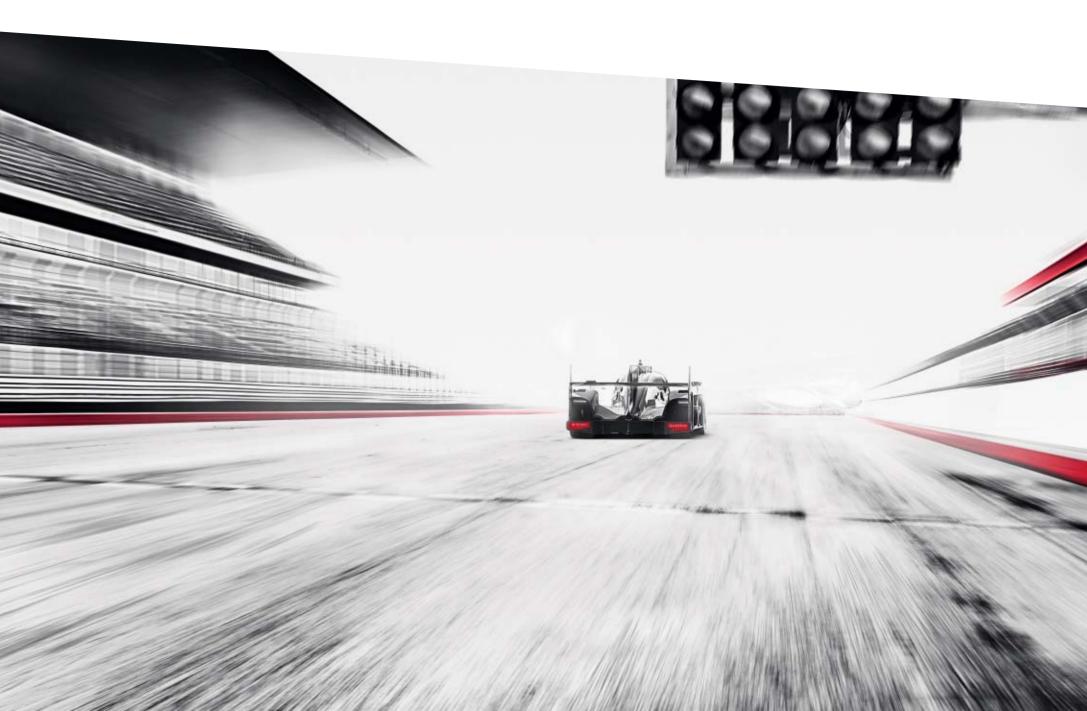

The world is constantly changing. Technology is advancing at an ever faster pace. And in the process, more and more opportunities are opening up to you – nowhere more so than in the field of mobility. We are playing an instrumental role in shaping this progress with Vorsprung durch Technik. Striving to provide you with technology that enriches your life. Making sure that we don't just satisfy your expectations of mobility both today and in the future, but continue to surpass them.

Audi Sport: Technologies from motor racing. Transferred to the road.

Thrilling performance. Whether it's works motorsport, customer racing or our high-performance models – you'll not get such a potent adrenalin rush anywhere else. Audi Sport utilises the expertise gained in motor racing to bring innovative technologies to series production. With unrivalled passion – for outstanding dynamism.

Consistent power. Put to consistent use.

The TFSI[®] engine.

Powerhouse: the 4.0 litre V8 TFSI engine with 412 kW. With a maximum torque of 700 Nm the Audi RS 7 Sportback accelerates from 0 to 100 km/h in just 3.9 seconds. The propulsive power ends at an electronically regulated 250 km/h, with the option of boosting the top speed to 280 km/h or 305 km/h.

Efficiency system: with Audi cylinder on demand only four of the eight cylinders are active in partial-load operation depending on the driving conditions. The Audi valvelift system closes the intake and exhaust valves on two cylinders on each side and switches off their injection and ignition – whilst the engine continues to run as quietly as ever. As a result, neither is air drawn in nor fuel consumed – the fuel consumption and emission figures are noticeably improved. The 4.0 litre V8 TFSI engine also features a start-stop system and recuperation. And also excels with its spontaneous responsiveness and extraordinary power delivery over the entire engine speed range.

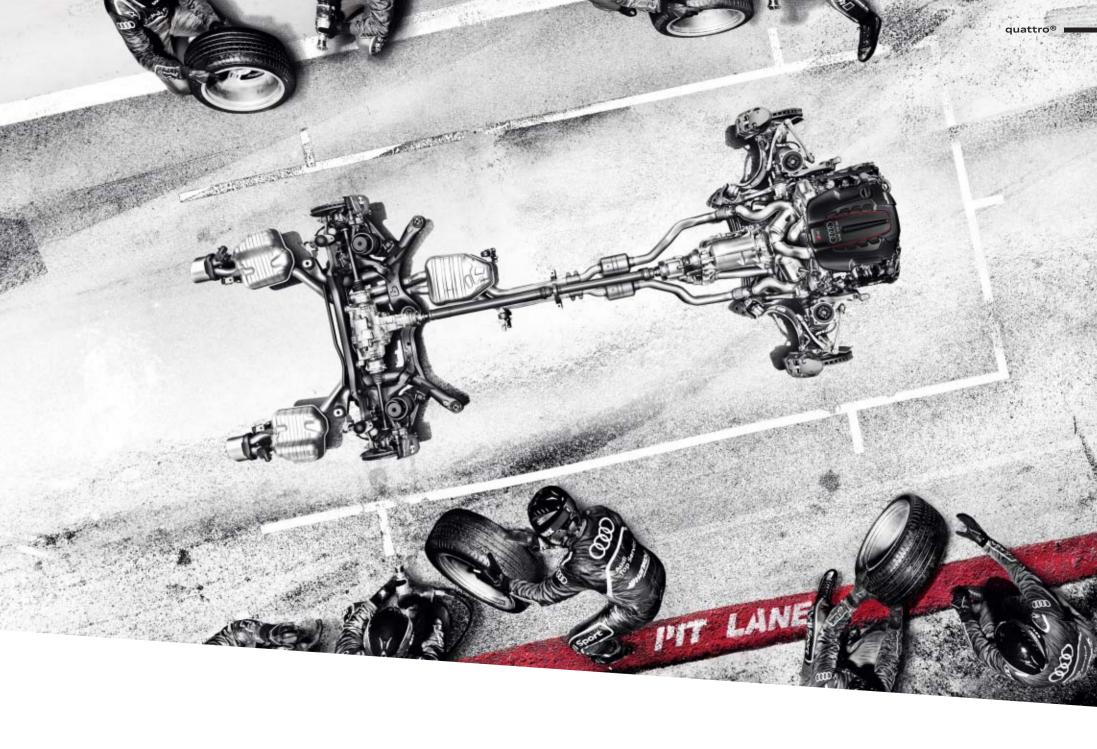

Control centre: the 8-speed tiptronic constitutes an adequate automatic transmission which is characterised by rapid gear changes and high efficiency. Thanks to the Dynamic Shift Program (DSP) gear-changing takes place in the optimum engine speed range – reducing power flow losses while you enjoy agile motoring. The tiptronic comes with a sport program (S) or manual mode for an even more dynamic driving style.

Superlative roadholding.

quattro[®] permanent all-wheel drive.

Outstanding traction, improved handling dynamics and more driving safety. Or quattro for short. Hardly any other drive system around transfers the engine's power to the road so effortlessly. The central component is the self-locking centre differential. The basic configuration of the purely mechanical planetary gear set distributes the drive torque asymmetrically for better driving dynamics. In a ratio of 40:60 between the front and rear axle. But if necessary up to 70% can be distributed to the front or up to 85% to the rear to offset any occurring wheel slip. Using wheel-selective torque control, the drive force is distributed to each individual wheel depending on the driving situation. What is special here is the way the effects of the torque distribution are felt before any undesirable wheel slip occurs. The result is a yawing moment which supports cornering – and thus provides precisely controlled, sporty handling with increased agility while maintaining superb traction.

By request the quattro drivetrain can be fitted with the sport differential on the rear axle, in order to further enhance driving dynamics.

Bending the road to your will. RS suspension and RS brake systems.

RS brake systems

Demonstrate power. With the standard 19-inch RS brake system in the Audi RS 7 Sportback. The 6-piston fixed callipers at the front take powerful hold of the wave brake discs whose cast friction ring with a wave-shaped outer contour is connected to the aluminium brake disc chamber by means of steel pins. This so-called floating mounting ensures that the friction ring remains largely tension-free, ride thus improving stability when subjected to high feature temperatures. Axial perforation and cooling channels for internal ventilation increase the performance of the brake discs. The intelligent mix of materials and the characteristic geometry of the friction rings help reduce weight, thus improving the balance of the unsprung masses.

The optional 20-inch ceramic brake system* is available for even tougher requirements. It features brake discs made out of a carbon-fibre reinforced ceramic material which is based on hard silicon carbide with embedded high-strength carbon fibres. The result is enormous abrasion resistance, a long service life, reduced weight p and higher fading resistance.

RS suspensions

Show character. Self-assured, sporty. With the RS adaptive air suspension.
 Experience outstanding directional stability and excellent agility coupled with precise steering characteristics. Thanks to the 5-link front axle design.
 Coupled with the self-tracking trapezoidal link principle of the rear axle.
 Many chassis components are made of aluminium to reduce weight and l keep the unsprung masses low. The RS adaptive air suspension combines air suspension with a variably adaptive damper system. It allows for various ride heights and simultaneously acts as a level regulator so that driving features are not compromised even with a heavy load. The upshot is dynamic handling.

erials The RS sport suspension plus with Dynamic Ride Control (DRC) is available as an option. Steel springs and shock absorbers with variable characteristics of reduce the pitching and rolling movements around the lateral and longitudinal axes by purely hydraulic means. The diagonal dampers are connected to one another via oil pipes and one central valve each. If the dampers compress differently, for example during fast cornering, the valves regulate the oil flow to the deflected wheel. They increase support there, thus reducing side tilt and enhancing driving dynamics.

The electromechanical power steering with RS-specific characteristic curve provides additional dynamism. Thanks to the low-position configuration, the steering forces are conducted just a short distance to the wheels, which provides a spontaneous steering response, precise feedback from the road and even more fun on bends. The steering also requires almost no energy when driving in a straight line, thus helping to reduce fuel consumption.

*Please consult your Audi partner or national Audi website to find out more about the special features of the ceramic brake. The fuel consumption and CO₂ emission figures can be found on page 56.

Reach your destination. The way you want. Audi drive select.

Change character. With the standard Audi drive select in the Audi RS 7 Sportback. Individual vehicle components can be influenced at the push of a button – such as the engine characteristics, exhaust flap control, transmission mode, the damper regulation of the RS adaptive air suspension and the steering torque of the electromechanical power steering – to adapt them to the prevailing driving situation. With four different modes including various settings: auto, comfort, dynamic and individual. auto for superior sporty quality. comfort for longer journeys. dynamic for more ambitious driving. And individual, so you configure the individual components yourself according to your preferences.

In addition, various optional systems can be adjusted. For example, the characteristic curves of the shock absorbers on the RS sport suspension plus with Dynamic Ride Control (DRC) can be varied in three levels: from balanced rolling in comfort mode through to sporty, direct responsiveness in the dynamic setting. The optional dynamic steering can also be varied. The power steering assistance and ratio are changed depending on the road speed and the Audi drive select mode chosen. The optional quattro with sport differential also allows additional infinitely variable distribution of the drive forces between the rear wheels. This torque manipulation specifically influences the vehicle's steering behaviour and increases agility even further. The adaptive cruise control response can also be set to be either more gradual or more spontaneous.

As unique as you are. The equipment options.

Sportiness, comfort, design, functionality – whatever you demand of your Audi, it offers you a wealth of custom options. Audi equipment versions are varied and high-quality and you can tailor them entirely to your needs.

Character takes on many forms. Here are two of them.

What makes an Audi your Audi? Vehicle equipment entirely tailored to your needs. There are a wide range of options available to you for giving your vehicle the exact touch you have in mind. More sportiness? More elegance? Let yourself be inspired.

* Please note the special information relating to wheels on page 56.

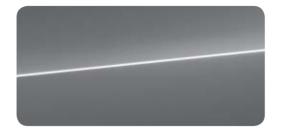

Your Audi is painted not just once. But several times.

Choose the paint finish to suit your individual taste. But whichever colour you opt for, you can count on the outstanding quality of our painting process. Though no thicker than a human hair, the layer of paint on an Audi is actually made up of four different coats. And with a matt effect paint finish as many as six. To ensure that your Audi is optimally protected from environmental influences and wear. And also outwardly reflects your personality.

The perfect connection between an Audi and the road: Audi wheels.

To make sure you have peace of mind for every metre of your drive, Audi puts its wheels through an exacting series of specialised test procedures. Hardness tests, for example, aim for maximum stability, while a copper accelerated salt spray test - CASS for short - using acetic acid guarantees the greatest possible corrosion protection. Thanks to these and many other measures, we can ensure that every Audi wheel offers maximum quality - even after scores of kilometres. No matter which of the numerous designs you choose.

|Equipment packages

Comfort package

includes:

- Bose Surround Sound
- seat heating, front and rear
- interior mirror, automatically dimming
- exterior mirrors, electrically adjustable, heated and folding, automatically dimming on both sides, with memory function
- 75 l fuel tank

Dynamic package

includes:

- dynamic steering
- guattro with sport differential
- RS sport suspension plus with Dynamic Ride Control (DRC)
- top speed increased to 280 km/h
- Audi Matrix LED headlights
- interior mirror, automatically dimming

Dynamic package plus

includes:

- ceramic brake
- dynamic steering
- quattro with sport differential
- RS sport suspension plus with Dynamic Ride Control (DRC)
- top speed increased to 305 km/h
- Audi Matrix LED headlights
- interior mirror, automatically dimming

|Headlights/interior light

LED headlights

allow precise, near-daylight illumination of the road; combine LED dipped beam, high beam, daytime running lights, motorway light, indicator and static turning light as well as an all-weather light; including headlight cleaning system; motorway light that automatically increases headlight range from a speed of approximately 110 km/h; triggered for a few milliseconds, creating a pulse of light all-weather light to reduce the risk of the driver being dazzled when visibility is poor; striking light pattern in day When operated, the indicators send a distinctive signal and night design configurations; low energy consumption to other road users and long service life

Audi Matrix LED headlights

The innovative technology combines a camera system with LED light sources and precision optics for highly adaptive light distribution. The system blanks out light that would otherwise shine directly on oncoming vehicles limits, automatically detects the headlights of oncoming or vehicles in front but continues to fully illuminate all the other areas in between and alongside. The front lighting thus adapts dynamically, providing the driver with a much wider visual range. The conventional division between dipped and high beam is dispensed with. Familiar convenience functions such as the static turning light, all-weather light, junction light, motorway light and travel Ambient lighting mode, which uses GPS data to switch between right- and left-hand drive modes, are integrated into the LED technology. The LEDs of the Audi Matrix LED headlights also perform the dynamic cornering light functions. Using vehicle support based on navigation data, it starts responding shortly before the steering wheel is turned. The marking light cooperates with the optional night vision assistant. If pedestrians are detected, individual LEDs flash briefly three times in succession to mark out the pedestrians clearly from their surroundings. Distinctive features include the crisp lighting pattern, the LED daytime running lights and the dynamic indicators in the headlights and rear lights as well as the dark-tinted surrounds at the front. Including headlight cleaning system

LED rear lights with dynamic indicators

brake lights, tail lights, rear fog lights, indicators, reversing lights and rear number plate lights in low-energy LED technology; with third, high-mounted brake light in the rear window; with dynamic, clearly visible actuation of the indicators: segments of the LED light band are that runs outwards in the direction the car is turning.

High-beam assist

improves the driver's visibility and ensures a more relaxed insert in gloss black drive thanks to the extra comfort and convenience. Depending on the traffic situation, the high beam is automatically switched on or off. Working within system traffic. the rear lights of other road users and light sources Trim strips in built-up areas. In conjunction with the optional night vision assistant, the networked vehicle functions provide the marking light for detected pedestrian for enhanced safety when driving at night.

including integrated eyewear compartment in the roof module; ambient lighting can be configured via the MMI

- glove compartment lighting
- luggage compartment lighting
- active door reflectors

in LED technoloav:

- courtesy lighting on the underside of the door handles
- entrance lighting, front and rear
- 2 reading lights each at front and rear
- mirrors and footwell
- ambient lighting for centre console and door inner panels to help occupants better orient themselves

|Climate control

4-zone deluxe automatic air conditioning

- with indirect ventilation and sunlight-dependent control
- electronically regulates the air temperature, flow rate and distribution
- humidity sensor
- combined fine particulate filter
- automatic recirculation mode by means of air quality sensor
- use of residual heat
- separate regulation of footwell temperature
- ventilated glove compartment
- front air-conditioning controls with digital display separate temperature control for driver and frontpassenger sides
- ventilation in the rear via the centre console air vents in the B-pillars
- additional air-conditioning controls with digital display for climate control in the rear with separately adjustable temperature and blower control and air distribution for the right- and left-hand sides (rear functions can also be set from the front air conditioning control)
- choice of 3 climates: gentle, medium, intensive kev-coded settings

Closing systems

Convenience kev

access authorisation system, the key only needs to be carried with you; the vehicle is locked and unlocked from outside via sensors on all door handles. The luggage compartment lid can also be opened separately when the vehicle is locked.

Luggage compartment lid, electrically opening and closing

opening via the button on the vehicle key or in the driver's door or using the soft touch button in the luggage compartment lid handle recess; closing via button on inside of luggage compartment lid, the button in the driver's door or via the optional convenience key (long press). In conjunction with the convenience key, it is possible to close the luggage compartment lid and simultaneously lock the car via an additional button on the inside of the luggage compartment lid. Including power-assisted closing and programmable luggage compartment lid opening angle

Convenience key with sensor-controlled luggage compartment lid release

features as for convenience key. Moving your foot (in a kicking motion) below the rear bumper causes the luggage compartment lid to swing open automatically when the vehicle key is recognised.

into the locks

Garage door opener (HomeLink)

programmable radio-operated remote control with operating buttons integrated into the front roof module; can be used to open many garage doors and exterior gates; console allows control of security and lighting systems; code identification guidance and set-up assistance provided by Storage package the MMI navigation plus. For further information please contact your Audi partner or visit www.eurohomelink.com.

Anti-theft alarm

monitors doors, bonnet and luggage compartment lid: includes interior monitoring (can be deactivated), towaway protection via a vehicle angle of inclination sensor opened from the inside once the vehicle has been locked compartment; luggage compartment cover with the vehicle key

Preparation for tracking system

Storage/transport

Storage compartments

automatically pulls doors that are not completely closed storage compartment in the door trims, storage net on the backs of the front-seat backrests, storage compartment under the front seat (not in conjunction with customised contour seats, front); glove compartment on the frontpassenger side, lockable, large-volume, illuminated, with holder for writing utensils; 2 cup holders in the centre

luggage compartment net for securing to the lashing points on the luggage compartment floor, additional 12V socket in the rear

Luggage compartment

large-volume, with large through-loading width; including side net and 12V socket on the right-hand side of the and signal horn independent of the vehicle electrical system: luggage compartment as well as bag hooks on the left with safe-locking function: prevents the doors from being and right and 4 lashing points on the floor of the luggage

Through-loading facility

for the practical transportation of long objects

Through-loading facility with removable ski/snowboard bag

for the practical transportation of long objects, e.g. up to 4 pairs of skis or 2 snowboards: ski/snowboard bag can be removed and secured by a strap

Reversible mat

to cover the luggage compartment, even with the rear seat backrest folded down: velour on one side. rubber on the other

|MMI[®]/navigation/display instruments

RS instrument cluster

with black dials, red needles, white scales, RS 7 logo in rev counter and dynamic ready-check feature

Driver information system with colour display

high-resolution 7-inch TFT colour display directly in the driver's field of vision; displays information from the MMI system, the infotainment systems and the driver assistance systems; display for the onboard computer with short and long-term memory, digital speedometer, gear display, outside temperature, plus door and luggage compartment lid check; RS menu with shift light, charge pressure and oil temperature display as well as lap timer; can be operated via an RS multifunction sport leather steering wheel: including attention assist: attention assist warns the driver by way of an acoustic signal and a visual warning if it deems the driver's attention is lapsing.

Head-up display

Information relevant to the driver from assistance systems, the navigation system or the RS menu of the driver information system and warnings are projected as required onto the windscreen in the driver's direct field of vision. The height-adjustable head-up display provides a multicoloured display with good contrast and minimal distraction from the road. Activation via button next to the light switch

MMI[®] navigation plus with MMI touch

- navigation system¹ including map updates²
- electrically extending high-resolution 8-inch colour displav
- 3D map representation with display of lots of sightseeing information and city models
- detailed route information: map preview, choice of alternative routes, POIs, lane recommendations, motorway exits, detailed junction maps, etc.
- MMI touch: touch-sensitive control panel for fast, intuitive operation e.g. destination entry by means of handwriting recognition as well as free movement and zooming in the map
- voice control system with whole-word entry of address in one sentence
- access to smartphone voice control
- driver information system with 7-inch colour display including display of navigation map
- dynamic route guidance with TMCpro (in conjunction with Audi connect: traffic information online³)
- vehicle support based on navigation data and speed limit displav
- country information: information on valid speed limits, motorway toll sticker requirement, etc. when crossing a border
- myAudi special destinations: import individual point-of-interest (POI) lists to the vehicle via the myAudi portal, including optional approach instructions
- MMI radio plus
- Audi sound system
- flash memory for music (10 GB)
- DVD drive (MP3, WMA, AAC and MPEG-4 compatible) for music CDs and video DVDs: AUX-IN connection
- 2 SDXC card readers
- Audi music interface for connecting portable media players via the USB interface (including power supply/charging function) or Wi-Fi
- Bluetooth interface for hands-free function and audio streaming
- display of emails and messages from mobile phone in selected languages including text-to-speech function⁴
- use of services supported by Audi connect⁵

¹The navigation data for supported countries is contained in the integrated memory. For more information, please contact your Audi partner. ²The map version delivered can be updated with the first 5 updates which are issued at intervals of 6 months. The current navigation data can be downloaded from the myAudi platform at www.audi.com/myaudi and installed via SD card in the vehicle. In conjunction with Audi connect, the update can be carried out online in the vehicle. It is also possible to have the new navigation data installed by an Audi partner (at extra cost). ³The Audi connect service traffic information online is available for several countries. For more information. please contact your Audi partner. 4 Provided the mobile phone has the Bluetooth profile MAP (Message Access Profile). Please contact your Audi partner or visit www.audi.com/bluetooth for information on compatible mobile phones. ⁵Requires the optional equipment Audi connect.

l Entertainment

Digital Audio Broadcasting

in addition to the range of analogue stations, receives programmes from digitally broadcast radio stations¹ according to DAB standard, including DAB+ and DMB audio: display of information accompanying the programme (e.g. artist and track, if provided by the radio station) as well as additional information in the form of a slide show impressive reproduction of 5.1 surround sound thanks to (e.g. cover and weather)

Digital TV reception

reception of digitally broadcast (DVB-T and DVB-T2) free-to-air television stations¹ (MPEG-2 or MPEG-4 standard) as well as DVB-T audio stations: display of information accompanying the programme such as teletext, subtitles and Electronic Programme Guide (EPG): automatic station search: external AV-IN connection via adapter cable; no picture possible when the vehicle is moving

Audi music interface

Portable media players² such as an Apple iPod/iPhone (music functionality) as well as USB storage media and MP3 players can be connected to the vehicle via a USB interface (including power supply/charge function) or Wi-Fi. Located in the centre console: operated via MMI or RS multifunction sport leather steering wheel; part of MMI navigation plus with MMI touch

DVD/CD changer

for 6 DVDs or CDs, supports e.g. audio CDs, video DVDs; shock-resistant location in the glove compartment and can be operated via MMI

impressive sound thanks to 6-channel amplifier with a total output of 180 watts and 10 loudspeakers including centre speaker and subwoofer

Bose Surround Sound

Audi sound system

12-channel amplifier with total output of 472 watts and 14 loudspeakers including centre speaker and subwoofer; AudioPilot® for noise-dependent volume adjustment and powerful and accurate bass reproduction, lifelike sound with natural tone and a feeling of space for an outstanding sound experience

Bang & Olufsen Advanced Sound System

exhilarating reproduction of 5.1 surround sound with 15 loudspeakers including centre speaker and subwoofer, each with its own amplifier channel. The efficient 15-channel DSP all-digital amplifier with integrated 5-channel ICE Power amplifier for woofers and subwoofer features a total output of over 1200 watts. Polished loudspeake covers in aluminium and automatically extending acoustic Communication lenses for excellent sound performance and perspective from every seat, with noise-dependent volume adjustment. Privacy function provided by encapsulated loudspeaker casings which minimise the escape of sound to the outside of the vehicle and provide privacy, for example when making telephone calls

Preparation for Rear Seat Entertainment

includes pre-installed wiring and mounts for the holders in the driver and front-passenger seat backrests. The appropriate Audi Entertainment mobile or Apple iPad adapter are available as a plug-and-play unit from Audi Genuine Accessories

|Communication

Audi connect

convenient connection of your vehicle to the internet for the use of Audi connect via an integrated data module with LTE³/UMTS support. There is a reader for your SIM card in the surround of the MMI navigation plus with MMI touch.

The following services supported by Audi connect are currently available in your model:

Mobility & navigation

- point-of-interest (POI) search with voice control
- traffic information online⁴ picturebook navigation
- fuel prices parking information
- navigation with Google Earth^{™5} and
- Gooale Street View™⁵
- map update online⁶
- destination entry via myAudi or Google Maps^{™5}

- Wi-Fi hotspot
- messages (text messages)^{7,8}
- access to Facebook
- access to Twitter
- access to smartphone voice control

Infotainment

- weather
- online media streaming⁹
- news online (individual)
- travel information

In conjunction with the optionally available Audi phone box, Audi connect includes a car phone function via SIM card slot or rSAP profile.

Use of the services supported by Audi connect is only possible with the optional Audi connect feature. You also require a SIM card with data option and, if you wish to use LTE, also an LTE option³. The services are only available in conjunction with an existing or separate mobile phone contract and only within the range of the respective mobile phone network. Additional costs may be incurred when receiving data packets from the internet, depending on the terms of your mobile phone contract, particularly when used abroad. Because of the high data volumes involved, a data flat rate is strongly recommended.

The availability of the services supported by Audi connect varies from country to country. Audi connect services are provided for at least 1 year from vehicle delivery. After 24 months have expired, the Audi connect services will be extended free of charge once for 12 months. If you do not require this free extension, please notify us by writing to the following address:

AUDI International	
Customer Care Services	
85045 Ingolstadt,	
Germany	
Email: kundenbetreuung@audi.de	
Tel.: +49 (0) 800-2834 7378423	

The services city events, train and flight information, plus any other services, are available to the customer for a period of 12 months. Ask your Audi partner about a subsequent extension of the Audi connect services.

Depending on the vehicle model. Audi connect provides access to Facebook, Google and Twitter services. Permanent availability cannot be guaranteed as this is the responsibility of Facebook, Google and Twitter.

Please visit www.audi.com/connect or contact your Audi partner for more detailed information about Audi connect; contact your mobile services provider for information about contract conditions.

Audi MMI[®] connect app

The Audi MMI connect app available for some smartphones⁸ supports the following Audi connect services: Audi music stream

 point-of-interest (POI) search with voice control destination entry via myAudi or Google Maps^{™5} traffic information online⁴

Bluetooth interface

- Bluetooth audio streaming. Bluetooth-capable mobile phones can be connected to the vehicle via the interface. Part of MMI navigation plus with MMI touch

Audi phone box⁸

allows phone calls with improved reception quality to be made in the vehicle by placing the mobile phone into the universal phone holder near the centre armrest, front: possible to connect 2 mobile phones¹⁰ via Bluetooth; hands-free facility and voice control (telephone): low SAR radiation in the interior thanks to connection to vehicle aerial; operated via MMI or the RS multifunction sport leather steering wheel; can be charged via USB port.

In conjunction with Audi connect, Audi phone box includes a car phone function via SIM card slot or rSAP profile.

Assistance systems

Hold assist¹¹

holds the vehicle stationary for unlimited periods after stopping in traffic on normal uphill and downhill gradients. The system is activated by push-button and allows the driver to drive away smoothly.

Parking system plus¹¹

acoustic and visual parking system, front and rear, assists with parking and manoeuvring. Information shown in the allows hands-free calls to be made in the vehicle using the MMI display; measurement by ultrasonic sensors concealed microphone and - depending on mobile phone compatibility⁸ in the bumpers; activated when reverse gear is selected or via the button on the centre console

Park assist¹

uses ultrasonic sensors to search for suitable parking spaces along the side of the road and helps the driver to manoeuvre in and out of parking spaces by performing virtually autonomous steering actions. Calculates the ideal parking path for perpendicular parking spaces and the ideal parking and exiting paths for parallel parking spaces. The driver has to accelerate, apply the brakes and monitor the parking process. Activated via a button on Cruise control¹¹ the centre console

Reversing camera¹¹

image of area behind the vehicle shown on the MMI display, with dynamic display modes showing the path calculated based on steering angle; auxiliary lines and guidelines and identification of the point at which to apply opposite lock when parallel parking; reversing camera integrated discreetly in the handle strip of the luggage compartment lid; activated when reverse gear is selected or via a button on the centre console

Front and reversing cameras¹¹

image of area in front and behind the vehicle shown on the MMI display, for the reversing camera with dynamic display modes showing the calculated path depending on the steering angle; help lines and guidelines and identification of the point at which to apply opposite lock when parallel parking; reversing camera integrated discreetly in the handle strip of the luggage compartment pre sense front: enhanced brake assist warns of any lid; additional display modes for front left/right side and rear left/right side for safe pulling out of tight parking spaces, courtyard entrances or in car parks; activated when braking action if necessary. In addition, maximum reverse gear is selected or via a button on the centre console braking is initiated at speeds below 30 km/h if there

Audi pre sense basic¹¹

automatically initiates preventive occupant protection measures where necessary: these include: belt tightening. activating the hazard warning lights and closing the slide-and-tilt glass sunroof (if ordered) and windows: categorises driving situations by networking the different Audi side assist including Audi pre sense rear¹¹ vehicle systems

At speeds of from around 30 to 250 km/h, the system keeps the set speed constant provided that engine power and engine braking effect permit it; operated via separate steering column stalk, set speed displayed in the driver information system

adaptive cruise control with Stop&Go function including Audi pre sense front¹¹

detects vehicles ahead with the aid of radar sensors The distance from the vehicle ahead is kept more or less constant by braking or accelerating (control range 0-250 km/h). 4 distance levels and 3 driving modes can be set (comfort, auto and dynamic). Including Audi imminent threat of collision with the vehicle in front. Can initiate partial braking action or boost the driver's is a danger of collision with a stationary or moving vehicle in order to reduce the speed of the collision or to avoid the collision if possible. Operation of adaptive cruise control via separate steering column stalk. Audi pre sense front can be deactivated via the MMI car menu

warns by means of an LED display on the relevant exterior mirror of any situations deemed critical for changing lanes. 2 radar sensors record the vehicle approaching at the side from behind and measure the distance and the difference in speed. The lane change assistant provides support in the speed range from around 30 to 250 km/h. In addition to the functions of Audi pre sense basic. Audi pre sense rear uses the rear sensors of Audi side assist to detect a possible rear-end collision. Activated via a button in the mirror guadrant

¹ Reception depends on digital network availability. ² Please contact your Audi partner or visit www.audi.com/mp3 for information on compatible media players. ³ Please contact your Audi partner regarding availability and use of LTE support. 4 The traffic information online service from Audi connect is available for many countries. For more information, please contact your Audi partner. 5 Google and the Google logo are registered trademarks of Google Inc. ⁶The map version supplied can be updated with the first 5 navigation updates which are issued at intervals of 6 months. The current navigation data is provided for downloading on the myAudi platform at www.audi.com/myaudi and can be installed via SD card in the vehicle. In conjunction with Audi connect, the update can be carried out online in the vehicle. It is also possible to have the new navigation data installed by an Audi partner (at extra cost). ⁷ Provided the mobile phone has the Bluetooth profile MAP (Message Access Profile). ⁸ Please contact your Audi partner or visit www.audi.com/bluetooth for information on compatible mobile phones. ⁹ Depending on country-specific availability. To use this feature you will generally require an account with a media streaming provider. Additional costs may be incurred as a result. ¹⁰ For information on when this feature will be available, please contact your Audi partner. ¹¹Please note: The systems work only within system limits and support the driver. However, the driver remains responsible for driving the vehicle and is required to be attentive.

Assistance systems

Audi active lane assist¹

helps you to keep in lane by means of gentle, corrective steering intervention. The lane compliance assistant is triggered when the driver starts to cross detected lane markings without activating an indicator. The system provides support in the speed range from around 60 to 250 km/h. Steering wheel vibration can be set if the driver wants; additional display in the optional head-up display; activation via button on the steering column stalk for the indicator.

Audi pre sense rear, a perceptible steering movement is also made before leaving the lane, if changing lane is deemed particularly critical due to a vehicle approaching • LED headlights in combination with high-beam assist from behind. This steering movement is made even if the • Audi Matrix LED headlights indicator has been activated but only if both systems are activated and ready.

Assistance package including Audi pre sense plus¹

combines the following assistance systems:

- adaptive cruise control with Stop&Go function
- Audi side assist
- Audi active lane assist
- Audi pre sense basic
- Audi pre sense front
- Audi pre sense rear

A maximum deceleration function provided by Audi pre systems in the assistance package complement each other or provide a warning if the displayed speed is exceeded. and provide mutual assistance. Details of how to activate or adjust assistance systems can be found in the relevant system description.

Night vision assistant¹

assists the driver when driving at night by displaying a thermal image of the surroundings. People and larger wild animals are highlighted in yellow on the colour display in the driver information system. If they move or if the system determines from their position that there is a potential risk, the marking changes to red, a warning triangle appears and a warning tone is emitted.

In conjunction with one of the following lighting systems, In conjunction with the optional Audi side assist including the marked person is also illuminated with 3 successive brief flashes of the headlights (marking light):

Additional display of warnings in the optional head-up display: activation via button next to the light switch

Camera-based speed limit display^{1,2}

recognition and display of speed limits, including temporary speed limit displays: there is an evaluation of the particular dynamic situation in wet conditions, with speed limits displayed depending on the time of day: if a sign has not been recognised by the camera, thanks to Audi connect the speed limit taken from the current navigation data can be displayed: automatic display in the driver information system, additionally in the optional head-up display. The Differential Lock (EDL); distributes the drive forces sense plus is added to the aforementioned functions. The system simply provides information and does not intervene

Driving dynamics/brakes

Audi drive select

features different modes - comfort, auto, dynamic and individual - which allow you to change the vehicle's characteristics by adapting the power steering assistance, engine characteristics, gear-change characteristics, RS adaptive air suspension, exhaust flap control and the settings of other optional equipment

RS adaptive air suspension

of the electronically controlled air suspension with infinitely variable adaptive damping system on all 4 wheels; with RS 7-specific tuning; includes ride height control and manual lift function; various modes can be selected via Audi drive select

RS sport suspension plus with Dynamic Ride Control (DRC) adjustable in 3 stages: single-tube gas-filled shock absorbers with variable damper characteristics and coil springs; control range of Dynamic Ride Control (DRC) can be selected in 3 stages via Audi drive select: comfort. auto.

quattro®

permanent all-wheel drive with self-locking centre differential and asymmetric/dynamic torgue distribution, as well as wheel-selective torque control and Electronic depending on the driving situation to each individual wheel for precisely controlled, sporty handling; guattro emblem in the dashboard on the passenger side

quattro[®] with sport differential

variable amounts of drive force to each rear wheel and ensures outstanding acceleration performance in corners and stabilises the vehicle's response to load change. It also improves direct steering characteristics and provides more agile handling due to the lower steering effort reauired.

tiptronic

8-speed automatic transmission with Dynamic Shift Program (DSP) and sport program; option of manual control via shift paddles on the RS multifunction sport leather steering wheel or by nudging the selector lever

Electromechanical power steering

combines precision and comfort with exceptional energy-saving technology. The electromechanical automatically controls vehicle level and damping by means steering system with speed-dependent power assistance ensures stability at high speeds whilst also being light and precise when parking and manoeuvring. With active countersteering to provide steering assistance to the driver for enhanced vehicle stability

Dynamic steering

when cornering, changing lanes or parking, for example this system improves handling and ride comfort by dynamically regulating steering according to the driving situation; in addition to adaptation of the steering effort, the steering angle is also adapted (steering ratio); also supports vehicle stabilisation through ESC

RS brake system

19-inch diagonally-split high-performance brake system Antilock Brake System (ABS) with Electronic Brake Force Distribution (EBD). Electronic Stabilisation Control (ESC) with brake assist, aluminium tandem brake booster, wave brake discs ventilated at front and rear, perforated and with floating mounting; brake callipers painted in gloss black with RS logo at front and rear

Brake callipers painted gloss red

The electronically controlled sport differential distributes for RS brake system, with RS logo front and rear

Equipment

Equipment packages Lights Design Steering wheels/controls Comfort Infotainment Assistance systems Technology/safety Audi Extended Warranty

Ceramic brake³

20-inch high-performance brake system with carbonfibre reinforced ceramic brake discs and brake callipers painted in gloss anthracite grey and featuring the "Audi ceramic" logo at front and rear; ventilated and perforated brake discs with special cooling channels

Top speed increased to 280 km/h

electronically regulated

|Technology/safety

Electronic Stabilisation Control (ESC)

with sport mode, can be deactivated in 2 stages: provides better stability at any speed through targeted braking of individual wheels and intervention in the engine management system; networks the ABS, EBD, ASR and EDL with its own sensors and compares the driving data with reference data

RS exhaust system

dual-branch design with chrome-plated oval tailpipe trims

RS sport exhaust system

for an enhanced acoustic experience; dual-branch, with gloss black oval tailpipe trims

Recuperation

economises on fuel through brake energy recovery; kinetic energy is converted into usable electrical energy by increasing the generator voltage when the vehicle is coasting or braking and relieving the generator during subsequent acceleration

Start-stop system

helps to reduce fuel consumption and CO₂ emissions by automatically switching off the engine when the vehicle is stationary, e.g. at traffic lights. The start process is initiated as soon as the foot brake is released. Can be deactivated at any time via a button

Side airbags, rear

Audi exclusive seat belts

individual choice of colour for seat belt from the Audi exclusive colour range

ISOFIX child seat mounting and top tether for the rear seats

standard mounting for practical attachment of ISOFIX child seats; includes additional fastening point (top tether)

Recommended child seats can be obtained from your Audi partner.

ISOFIX child seat mounting for the front-passenger seat

with passenger airbag deactivation switch, includes separate electric child-proof lock on rear doors

Audi Extended Warrantv

Audi Extended Warrantv

to supplement side airbags, front, and head airbag system The Audi Extended Warranty provides extended risk cover and cost control beyond the first 2 years of the manufacturer's warranty for a variety of claims. It can be ordered directly and only on purchase of a new car. Choose from nine combinations of service life and mileage. For more information, please contact your Audi partner.

Model	RS 7 Sportback
Engine type	V8 petrol engine with direct fuel injection and turbocharging
Displacement in cc (valves per cylinder)	3,993 (4)
Max. output ¹ in kW at rpm	412/5,700-6,600
Max. torque in Nm at rpm	700/1,750-5,500
Power transmission	
Drive type	quattro® permanent all-wheel drive
Transmission type	8-speed tiptronic
Weights/capacities	
Unladen weight² in kg	2,005
Gross vehicle weight in kg	2,515
Permissible roof load limit in kg	100
Fuel tank capacity, approx. in l	65
Performance/consumption ³	
Top speed in km/h	250⁴
Acceleration 0–100 km/h in s	3.9
Fuel grade	Sulphur-free SuperPlus 98 RON⁵
Fuel consumption ⁶ in l/100 km urban extra-urban combined	13.3 7.3 9.5
CO ₂ emissions ⁶ in g/km urban extra-urban combined	308 170 221
Emission standard	EU6

Explanatory notes

- ¹ The figure given was calculated using the specified measuring procedure (current version of UN-R 85).
- ² Unladen vehicle weight includes driver (75 kg) and fuel tank 90 % full, calculated in accordance with the current version of Reg. (EU) 1230/2012. Optional equipment may increase the car's unladen weight and drag coefficient, whereupon the possible payload limit and the top speed will be reduced accordingly.
- ³ A vehicle's fuel consumption and CO₂ emissions and deviations from the figures given do not just depend on how efficiently the vehicle uses the fuel, but are also influenced by driving behaviour and other non-technical factors. CO₂ is the greenhouse gas primarily responsible for global warming.

^₄ Regulated.

- ⁵ We recommend using sulphur-free SuperPlus unleaded RON 98 fuel complying with DIN EN 228. If this is not available, use sulphur-free super unleaded RON 95 fuel complying with DIN EN 228; power output will be slightly reduced. Unleaded RON 95 fuel with a maximum ethanol content of 10 % (E10) can generally be used. Fuel consumption details refer to operation with RON 95 fuel complying with 692/2008/EC.
- ⁶ The figures given were calculated using the specified measuring procedures. The figures do not refer to one individual vehicle and do not form part of any offer, but rather should be used purely for purposes of comparison between the different vehicle models.

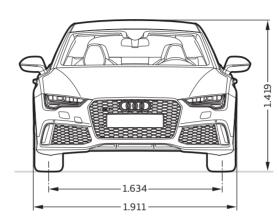

Important note

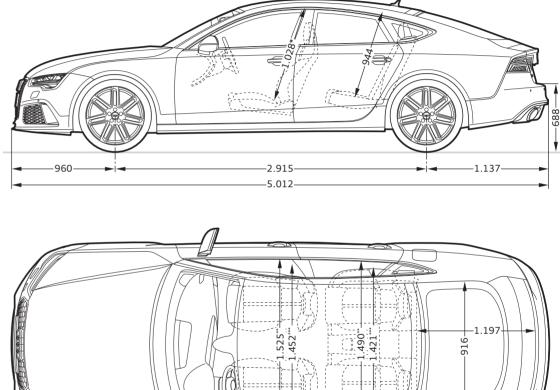

Special information about the wheels: Wheels with gloss turned finish as well as polished or partly polished aluminium wheels must not be used in wintry road conditions. For manufacturing reasons, these wheel surfaces do not have sufficient corrosion protection for such use and they can be damaged permanently by road salt or similar.

The Audi experience

The fascination of Audi can be experienced in many different ways. Audi City Berlin, Audi City London and driving experience allows you to live the excitement and Audi City Beijing, for example, give you digital access to all models at their actual size and in real time. And of course it is always worth visiting one of the major motor shows. This is where Audi always presents its new highly gualified instructors who provide practical tips to models and invites you to take a look at how the future help you optimise your driving skills. All this can now also is being shaped with "Vorsprung durch Technik". Anyone be enjoyed at the recently opened Audi driving experience interested in seeing how Audi is already putting this into center in Neuburg, near Ingolstadt. Facilities here include practice will find fascinating insight in the "Vorsprung a circuit of up to 3.4 kilometres that features challenging durch Technik" online special at www.audi.com. But a combinations of bends, a 30,000 m² dynamic driving area look back can also be rewarding: at the Audi museum and an offroad section where Q models can be put through mobile in Ingolstadt, history and high-tech go hand in their paces. hand. A total of 130 historic exhibits and modern forms

of presentation make for a thrilling symbiosis. Plus, Audi countless possibilities of current Audi models. Here, pure driving enjoyment is combined with valuable learning effects. This is ensured by a team of specially trained and

Responsibility

anchored in Audi strategy. Alongside commercial success to it that production in Audi plants gradually becomes and international competitiveness, our responsibility CO₂-neutral is another aspect of our comprehensive toward company employees and society as a whole is a approach. Audi is also committed to society – particularly key consideration, as is protecting the environment and in the fields of education, technology and social projects. conserving resources. And what is true in the details - our At Audi, sustainability is closely linked with how we see catalogues are printed on FSC-certified paper – also holds the future: the Audi Urban Future Initiative sees Audi in general: Audi develops cars that are not only sporty and working with international experts to get to the root of emotive but also ever more efficient. In the long run, Audi future urban challenges and trends in mobility.

Living up to our responsibilities is a principle that is firmly wants its products to allow CO₂-neutral mobility. Seeing

Team spirit

Audi has been among the champions in various racing Audi has been the main sponsor of the German Ski series, for instance the 24 Hours of Le Mans or the DTM Association (DSV) for almost three decades and has German Touring Car Masters. The values that are crucial in also partnered 16 other national alpine teams. In many different areas of sport are also central ones for football, we support national and international teams. Audi: precision, passion and technology. No coincidence And Audi is also a partner for the German Olympic then that Audi has been sponsoring sporting events for Sports Confederation.

Motorsport is a driving force behind the brand. For years many years. In the world of winter sports, for example,

Choosing an Audi means choosing a brand that offers more. More individuality. More exclusivity. More fascination.
